

High Voltage Systems Environmental Commitment

HVS believe that we have a responsibility to care for and protect the environment in which we operate. We are fully committed to improving environmental performance across our business activities. HVS will encourage our business partners to join us in this effort.

HVS recognises the following key impacts relevant to the company to be, energy use, waste generation, journeys to / from customer sites, procurement.

- We will strive to adopt the highest environmental standards in all areas of operation, meeting and exceeding all relevant legislative requirements. Assess our organisational activities and identify areas where we can minimise impacts.
- Minimise waste through careful and efficient use of all materials and by reusing, and recycling
- Purchase sustainable products wherever feasible
- Train employees in good environmental practice and encourage employee involvement in environmental action, for example by using electronic mail to send brochures, quotations, test / calibration reports, rather than paper mail, where acceptable to clients.
- Reduce risks from environmental, and health or safety hazards for employees and others in the vicinity of our operations.
- Aim to include environmental and ethical considerations in investment decisions where appropriate.
- Assist in developing solutions to environmental problems, and by continually assessing the environmental impact of all our operations.
